HIMANSHU KUMAR

Java Backend Developer | Spring Boot, Hibernate, PostgreSQL

Gurugram, India | +91 7668017984 | hmnsu.kd@gmail.com | linkedin.com/in/himanshu-kd | github.com/Egillio9

PROFESSIONAL SUMMARY

Java backend developer building production Spring Boot services at a fintech company since May 2026, across lease lifecycle management, bill payments, and an AI-driven RAG retrieval engine. Skilled in modern Java (Streams, Lambdas, Optional, Records, Pattern Matching), multithreading, JPA/Hibernate with PostgreSQL, and production observability with Prometheus, Grafana, and Sentry.

TECHNICAL SKILLS

Core Java:	Java 8 – 21 (Streams, Lambdas, Optional, Records, Pattern Matching), Collections, Multithreading & Concurrency, JVM Internals (GC, Class Loading), OOP & Design Patterns
Spring Ecosystem:	Spring Boot 3, Spring MVC, Spring Data JPA, Hibernate, Spring Security, REST APIs, Bean Validation, @ControllerAdvice
Databases & AI:	PostgreSQL, pgvector, HikariCP, ACID Transactions, Indexing & Query Optimization, Vector Embeddings, Semantic Search, RAG
Observability & DevOps:	Prometheus, Micrometer, Grafana (PromQL), Sentry, Docker, Gradle, Maven, Git/GitHub, CI/CD
Testing & Tools:	JUnit 5, Mockito, MockMvc, Postman, Appsmith, IntelliJ IDEA

WORK EXPERIENCE

Backend Developer Intern | SalarySe (Fintech), Gurugram, Haryana *May 2026 – Present*

Java 17, Spring Boot 3, JPA/Hibernate, PostgreSQL, pgvector, Prometheus, Grafana, Sentry

- **Leasing Platform:** Built 8+ REST endpoints and JPA/Hibernate entities (PostgreSQL) covering the full lease lifecycle in a multi-module Spring Boot monorepo, with transactional service logic and Streams-based data mapping.
- **Leasing HR Portal:** Built an HR portal for the leasing product with multiple dashboards, giving HR teams one place to view and manage their employees' leases.
- **Sol AI Agent (RAG):** Built the document ingestion and retrieval pipeline for the internal Sol AI agent: recursive chunking, embedding generation, and pgvector IVFFlat cosine-similarity search with sub-200ms retrieval via REST APIs.
- **Bill Payments:** Fixed 2 high-severity production bugs from Sentry: a NullPointerException in biller lookup (fixed with Optional, restoring transaction history) and 4 unmapped gateway error codes (enum-based mapping), removing 1,000+ daily log errors.
- **Observability:** Fixed PromQL rate-interval and counter-reset bugs in a 97-panel production Grafana dashboard for a credit-card partner funnel; built a 5-panel Voice AI dashboard with 3 alert rules (Prometheus, Micrometer).

KEY PROJECTS

JavaLearn — Online Code Judge & Learning Platform *Code* | *Live*

Java 17, Spring Boot 3, Spring Security, OAuth2, JPA, React, Docker

- **Sandboxed Judge:** Built a LeetCode-style judge with javax.tools.JavaCompiler that runs untrusted code in isolated child JVMs (ProcessBuilder) with 2s timeouts and 128MB heap caps; grades 24 DSA problems with instant verdicts (Accepted, TLE, Runtime/Compile Error).
- **Security & Data:** Added Spring Security with JWT and Google OAuth2; wrote JPQL aggregation queries for acceptance rates, category coverage, and leaderboards with no N+1 queries.
- **Deployment & Testing:** Shipped React + Spring Boot as one multi-stage Docker image on Render; wrote 21 JUnit 5 test suites for timeouts, memory limits, and edge cases.

Ledger Co — Loan Management & EMI Ledger Service *Code* | *Live*

Java 17, Spring Boot 3, Spring Data JPA, PostgreSQL, React, Docker, MockMvc

- **Ledger Engine:** Built a layered Controller–Service–Repository REST API for loan disbursements, lump-sum repayments, and EMI recalculation, using BigDecimal and immutable records to avoid rounding errors.
- **Validation & Testing:** Added Jakarta Bean Validation, explicit DTO mapping, and global @RestControllerAdvice error handling; reached 90%+ branch coverage with JUnit 5 and MockMvc.
- **Deployment:** Dockerized the backend on Render with managed PostgreSQL; frontend on Vercel with environment-based config and seeded demo data.

EDUCATION

B.Tech in Information Technology | ABES Engineering College, Ghaziabad *2022 – 2026*

Aggregate: 72% | Coursework: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks
